Float High – Grace and Strength

Design: Jens Juul Eilersen

Float High is a development of the Float sofa. Unlike the Float sofa with its low frame, the Float High is carried by slender steel legs, which elevates it gracefully from the floor.

Pick your poison

With the two Float sofa's; Float and Float High, it is possible to pick the one that is the perfect fit for each customer, but they still get the same look of a soothing and strong lounge sofa. The added height, that is gained with Float High, offers a lounge sofa that is not too low.

"Float High is in all its simplicity a more light and graceful version of the Float sofa. This way we can offer the best of both worlds so that there is something for everyone with these two sofas," says Designer Jens Juul Eilersen.

Combine the sofa any way you like. You can have a classic 2- or 3-seater or you can combine several modules into one long sofa for the entire family.

Up in the air

With an elegant aesthetic and carefully balanced proportions, the Float High floats gracefully above the floor. The decorative details of the moveable cushions combined with the softness from the down filling are what makes this to a lounge sofa in its purest form.

About Eilersen

Ever since 1895, the company has focused on craftsmanship, quality and innovation. Founder Niels Eilersen was the first in Denmark to use steam to shape wood. Innovation and tradition are still hallmarks of the company that has given name and life to many classics over the years. Since the 1930s, Eilersen has produced furniture with a focus on high quality, comfort and durability. This strategy has made Eilersen a well-known and recognized brand both nationally and internationally. Eilersen is currently run by the fourth generation.
