BEAN

Designer: Nils Juul Eilersen
Design Year: 2025

The Bean sofa combines an organic silhouette with flexible comfort, creating a sculptural design for modern living.

Bean continues Eilersen's exploration of comfort, flexibility and conceptual design.

Defined by its curved silhouette and fluid transitions, Bean brings a warm and inviting presence to contemporary interiors while maintaining a strong architectural identity.

The design offers generous seating surface combined with removable down-top backrests that allow the sofa to adapt naturally to different ways of sitting, gathering and relaxing. The removable backrests feature a foam core wrapped in a soft down cover, offering exceptional comfort while allowing the sofa to change character depending on how it is arranged and used.

As a standalone sofa, Bean appears playful and sculptural, while combined with a chaise longue or additional modules it takes on a calmer and more classic expression. From private homes to hotel lounges and open architectural spaces, Bean offers a versatile and contemporary design that invites relaxation and effortless living

FEATURES:

- This sofa is available in either a freestanding version or in modules that include an optional chaise lounge
- When ordered with a fabric or leather cover all frame covers are always removable including a calico cover underneath.
- Leg height can be increased by either 2 (3/4") or 4cm (1 1/2")with our leg heightening kit. Standard leg is 6x6x6cm (2 1/3").
- New cover is available for the model

WHAT TO CONSIDER:

- Due to the down cushioning, this product does best with regular fluffing

FRAME: Frame in solid Scandinavian pine doweled together in triangular frames, assembled and braced with low emission Masonite, using a water-based glue.

Seat suspension of highly elastic Nozag springs of varnished European carbon steel mounted in specially developed coated silent spring holders.

The frame is upholstered with several types of high-quality polyurethane and hard foam for comfort and long durability.

CUSHIONS: The seat cushion is a highly elastic polyurethane foam core with a wrap of 600 g Fiberfill.

The back support is a hardfoam core with a wrap of 100 % high-quality down and small duck feathers, sewn into a ribbed, down-proof cambric cushion (casing) in 100 % cotton.

All down and duck feathers are by-products of food production.

The down can emit a faint odour at high humidity and should be air-dried regularly. To maintain the shape and appearance of down cushion and pillows, regular fluffing-up and airing is recommended.

COVER: Bean is available upholstered in any fabric or leather from the Eilersen collection or in COM fabric or leather (Customer's Own Material).

With fabric and leather upholstery the delivery is with a removable cover on the frame, both with an inner cover in stout made of 100 % cotton.

All cushion covers are equipped with a high-quality zipper.

LEGS: Bean is delivered as standard with hidden black legs, 80 x 60 x 60 mm (3,15 x 2,36 x 2,36”), moulded in nylon (Polyamide PA6) produced with a content of 98 % recycled plastic.

The height of the legs (seat height) can be increased by +20 (0,78”) or +40 mm (1,57”).

WARRANTY: Eilersen provides a five-year manufacturer’s warranty against defects in the frame, springs and cushion filling.

No warranty is provided on fabric and leather from the Eilersen collection or on COM fabrics.

Please see guidance for choosing fabric and leather at HERE.

DIMENSION: All dimensions are frame dimensions.

LABELLING: Bean is indoor climate marked (Danish standard for indoor climate).
