

Model Playtower Outdoor · Design by Jens Juul Eilersen

Seat height: 39 cm · Total height (frame): 39 cm

Playtower outdoor is a multi-purpose piece of furniture that is both flexible and mobile. The back elements weigh almost nothing so both children and adults can easily move them around.

Playtower has been developed and constructed to withstand all the elements of nature outdoors for many years. Everything from the inside to the outside is specially designed and has been thoroughly tested to be able to offer outdoor furnishings in the same quality and comfort that characterizes Eilersen indoor furniture.

Playtower is available with Eilersen own outdoor fabric collection (see page 3) and with COM fabrics. (customers own material).

As an accessory, an outer cover in a robust textile (SUNBRELLA®) is offered, which is water-repellent, and which protects and resists all outdoor influences.

Seat frame without back support
130 x 130 cm

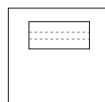

Back support
30 x 80 x 36/13 cm

Seat frame without back support
210 x 130 cm

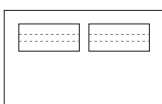

Back cushion
55 x 65 x 7 cm

Seat frame with back support
130 x 130 cm

Pillow

Model Playtower Outdoor · Design by Jens Juul Eilersen

Seat height: 39 cm · Total height (frame): 39 cm

SEAT BASE: Galvanized steel frame with a seat suspension of galvanized Nozag springs.

The seat foam in the seat base is made of a special constructed polyether with open cells. The open cells allow any liquid to run through the foam and creates a good breathing capacity that secures any residual moisture to evaporate.

The foam is threated against bacteria and fungi and shows no degradation after being exposed to pool- or seawater.

Both the seat and the back support are wrapped in 600gr. fiber fill.

BACK SUPPORT: The foam in the back support is made of a special constructed polyether with open cells. The open cells allow any liquid to run through the foam and creates a good breathing capacity that secures any residual moisture to evaporate.

The foam is threated against bacteria and fungi and shows no degradation after being exposed to pool- or seawater.

Both the seat and the back support are wrapped in 600gr. fiber fill.

BACK CUSHION: Is made of shredded pieces of a special constructed polyether with open cells. The open cells allow any liquid to run through the foam and creates a good breathing capacity that secures any residual moisture to evaporate.

The foam is threated against bacteria and fungi and shows no degradation after being exposed to pool- or seawater.

The back cushions cover is sewn together without a zipper.

COVER: The Playtower either comes with a cover from fabrics intended for use outdoors, see separate Eilersen outdoor collection for this, or with COM (customers own material).

The model is delivered with a removable cover on the seat part and the backrest block.

They cover on the back cushion cannot be removed.

LEGS: The model is supplied with galvanized steel legs, size Ø28 x 155 cm.

WARRANTY: A 5-year factory warranty is provided against manufacturing defects on the frame, springs and upholstery.

No warranty is given on fabric, but please refer to www.eilersen.eu for special instructions for choosing fabric.
